Foot Measuring Guide:

This measuring template is a approximate guide to the size of your feet and coincides with the footyboots4kids size chart.

Measure both feet, as it is quite normal for one foot to be bigger than the other, use the longest foot as the final size.

It is better to measure feet in the afternoon as feet tend to swell slightly during the day.

Also measure whilst wearing a football sock or a sock of similar thickness.

Place template on a hard even floor or a big hardback book.

Place the heel of the foot at the base of the arrow as indicated.

Make sure foot is completely flat, stand up straight putting weight on both feet.

Measure across from the end of the big toe to find size.
